

EVERHOT ELECTRIC STOVES

EVERHOT ELECTRIC STOVES

*Colourful steel and cast iron room heaters
which simply plug into a 13amp socket*

For over 40 years Everhot has led the way in innovative, energy efficient, heat storage cooker design now integrated into our unique stoves.

Hand built in the heart of the Cotswolds, Everhot electric stoves integrate our heat storage expertise into an elegant and efficient 1.5kW heater with cast iron door and beautifully crafted heat vent. Unlike a traditional wood burner or open fire, Everhot stoves do not require a flue and simply plug into a standard 13amp socket. Easy installation and classic design make them ideal for any space needing additional heat. A stunning focal point for living rooms, home and garden offices, conservatories and summer houses, annexes or even somewhere off the beaten track like a

shepherd's hut, narrowboat or campervan. As you would expect, Everhot stoves are British built for longevity and reliability. Along with their low peak load, they are ideal for use with solar panels as a solar dump where excess energy would otherwise be exported. Designed to be left on for longer periods of time, they are perfect for heating just one room of the house. Their clean, safe and easy-to-use design makes them ideally suited to holiday homes and guest rooms.

AVAILABLE IN TWO SPECIFICATIONS

EVERHOT ELECTRIC STOVE WITH 20 LITRE OVEN

The Everhot Electric Stove is a flawless blend of traditional good looks and modern efficiency, featuring our unique oven design. A 1.5kW thermostatically controlled heating element gently warms the room through our beautifully crafted heat vent. Behind the cast iron door you will find a 20 litre oven reaching up to 200°C and perfect for light meals, jacket potatoes and warming food through. Ideal for working from home without having to turn the central heating on or even leave the room for lunch! The quality engineered steel and cast iron heat storage construction will provide warmth long after the Stove has been turned off.

EVERHOT ELECTRIC HEATER WITHOUT OVEN

The Everhot Electric Heater brings warmth and a charming accent point to any room without the need for an oven. Its timeless design will emphasise an unused fireplace or bring character to the corner of a room. Shortly after turning on the Heater you will begin to feel heat coming through the top vent. After around half an hour, the main body will be up to temperature and radiating gentle heat into the room. Still featuring our heavyweight steel and cast iron build, but without an oven, the Electric Heater is slightly lighter than our Stove model and, with a fixed door, moving it from room to room as needed is easy.

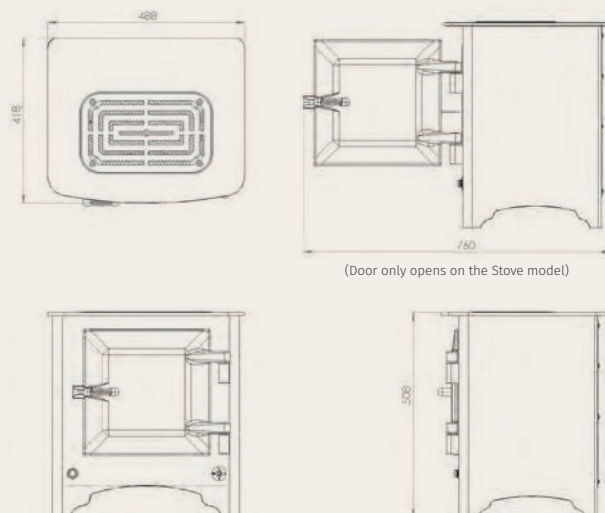

COLOURS

Both the Everhot Electric Stove and the Heater are available in our full range of colours, enabling you to complement any room in the house.

Black	Graphite	Matt Black	Marine Blue
Goose Grey	Cream	Dove Grey	White
Forest Green	Teal	Dusky Blue	Victoria Blue
Sage	Aubergine	Burgundy	Dusky Pink
Mustard	Tangerine	Fandango Pink	Clay
Mushroom			

DIMENSIONS

Small and refined yet big enough to provide warmth. Please note the cast iron door only opens on the Stove.

Oven dimensions: 271.5mm W x 277.5mm H x 275mm D
Weight 50kg (Stove) 40kg (Heater) • 1.5kW heater
